

GILFILLAN BROS., INC.
Los Angeles, California

FOR IMMEDIATE RELEASE

In the missile guidance field, the quick reaction capability of Gilfillan Bros., Inc., of Los Angeles, has assisted Space Technology Laboratories, Inc., to meet the urgent requirements of the Explorer VI program.

Gilfillan's area of participation in this project has been primarily in the development of precision frequency synthesizers, multi-channel frequency generators, minimal phase distortion high video frequency amplifier units, and sub-carrier demodulation equipment. Transistor technology has been incorporated in the difficult UHF band.
